JALADERAS DE EMBUTIR

Las jaladeras de embutir, diseñadas para la fácil apertura de cajones, puertas corredizas, armarios entre otros muebles, se caracterizan por su instalación empotrada o al ras de la superficie. Consiguiendo de ésta manera que, a diferencia de las jaladeras convencionales que sobresalen, las de embutir quedan niveladas con el material del mueble, creando una estética minimalista, limpia y discreta.

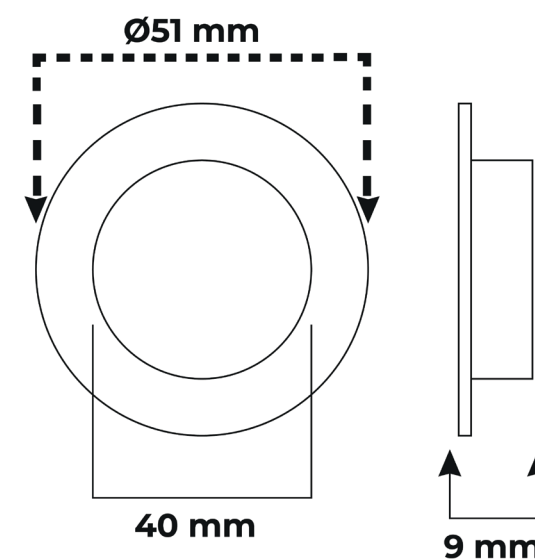

JALADERAS DE EMBUTIR
